

Inspection Machinery

For Food Processing and Packaging Environments

Product Solutions

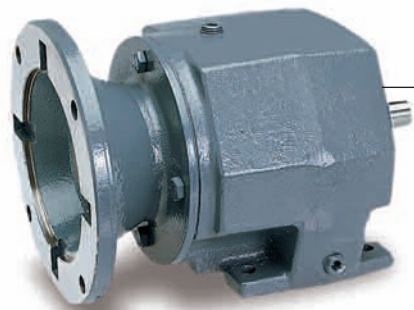

When your customers are leaders in their industry, there's no room for error in quality, delivery or cost. That's why manufacturers spend thousands of dollars on inspection machinery to inspect their products (metal detectors, foreign body detectors, fill height inspection, checkweighers, etc.), and their packages (seal inspecting, cap inspecting, empty bottle and can inspection, etc.) to gain extra security that their product quality will not be jeopardized by leaking packages, sealing problems, or other packaging defects.

Inspection Machinery manufacturers are being tested to provide machinery that provides precise, consistent test results, so that product problems are easily identified and corrected. That's why dozens of packaging OEMs look to Boston Gear and Warner Electric for high quality Power Transmission components for their machinery.

Boston Gear 800 Series Helical Speed Reducers

Boston Gear's 800 Series contains a focused selection of compact, heavy duty helical gear drives that offer long-life performance and simplified maintenance. The 800 Series provides a functional interchange for SEW Eurodrive and other European manufacturers' helical gear drives, making it uniquely practical for replacement applications.

Warner Electric Sensors and Safety Switches

Warner Electric has many years of experience in applying sensors and switches in motion control applications. Our broad range of innovative and technologically advanced noncontact sensors, industrial limit switches, and safety technology products offer our customers the exact solution to satisfy their sensing applications.

Boston Gear 700 Series Worm Gear Speed Reducers

Boston Gear offers the industry's largest variety of gear drive sizes, reduction ratios, shaft options and mounting styles. The 700 Series design is fabricated with the highest quality materials, providing maximum strength and durability. With millions of possible configurations, there is sure to be a 700 Series to fulfill your specific requirements.

Other products for use on Inspection Machinery include:

- Motors and Drives
- Packaged Clutches and Brakes
